

HPR Access Includes Podiatrists Beginning July 1, 2001

Beginning July 1, 2001, HPR Access—the direct access product for employer groups of all sizes—offers even more choices:

- Expanded access to include self-referral to podiatrists.
- \$30 co-payment for each specialist, mental health provider, or podiatrist visit.

Add all this to the original HPR Access, which gives you:

- Easier, more direct access to a larger specialty panel—over 530 physicians.
- An alternative to primary care referral (PCR).
- The ability to see any HPR Access participating specialist and mental health provider without a referral.
- Every HPR-affiliated medical group primary care physician panel.
- The option to use any HPR Access participating hospital at which your physician has privileges.
